Scientists develop new Chrysanthemum variety 'Shekhar'

9.5 centimeters. This particular variety is radically diverging and has semi-quill florets Onset of winters bring blooming season for that give the flower a unique dome-shaped flowers but with dropping temperature the crown like appearance. "The new variety has flowers crop also suffer. To keep the been developed through mutation induction flowering season lasts longer scientists keep by gamma irradiation of 'Su-Neel' which is its trying to develop flower varieties that can somatic parent variety" told Dr Arvind Jain, withstand extreme winters. In such an effort senior scientist, NBRI. Dr. Arvind also told scientists at National Botanical Research that Gladiolus, rose and gerbera are more Institute (NBRI) have developed and released popular in floriculture, but chrysanthemum a new variety of Chrysanthemum that also holds an important place. "Due to its blooms during late December to middiverse appearance, it is in high demand and February and named it 'Shekhar'. Dr. people like to plant flowers in their gardens Shekhar Mande, Director General, Council and homes. If cuttings of chrysanthemum are of Scientific and Industrial Research (CSIR) planted at a distance of half an inch, then released this new variety of Chrysanthemum about one thousand plants can be planted in a during the two-day Annual Rose and radius of one square meter", he said. If these Gladiolus Show organized by CSIR-National plants are sold at the rate of 10 rupees, then Botanical Research Institute, Lucknow. in a very short time, about 10 thousand rupees can be earned, said Dr Arvind.

This is a late blooming decorative type, floriferous chrysanthemum variety which bears mauve colored flowers. It attains the height up to 60 centimeters and have captiulum diameter (diameter across) up to 9-

Other major late-blooming varieties of chrysanthemum include CSIR-75, Ashakaran, Pooja, Vasantika, Maghi White, Gauri and Gulal, the flowering season is from mid-December to February. Kundan, Jayanti, Himanshu and Pukhraj are common season varieties of chrysanthemum. These usually flower between November and December. Similarly, the early varieties of chrysanthemum include Vijay, Vijay Kiran and NBRI-Kaul, mainly the flowering season is month of October.

A special feature of chrysanthemum is that it can be planted twice in a season and it is excellent as a potted plant. Chrysanthemums, the tropical flowers belong to the Asteraceae (Compositae) family, which is one of the largest families of flowering plants with over 1,000 genera and about 20,000 species.

Chrysanthemums were originally grown in the Eurasian region.

फुलों का मेला सजा तो क्या आम देक्या खास, हर कोई इस गुलशन के चहकते गुलों को देखने उमड़ पड़ा। मेले में बागवानों की मेहनत देखी जा सकती थी, जिन्होंने जी-जान लगाकर अपने समर्पण की खाद से इन फूलों को संवारा था। गुलाब एवं ग्लेडिओलस पुष्प प्रदर्शनी की बदौलत सीएसआइआर-एनबीआरआइ परिसर 🌌 खुशबू और रंगत से दो दिन तक खिला रहा। अंतिम दिन रविवार को पुरस्कार वितरण के साथ प्रदर्शनी का समापन हुआ। हालांकि हर फूल अपने में नायाब था, लेकिन खायत को निभाते हुए सभी प्रतिभागियों में से कुछ को विजेता चुना गया।

राष्ट्रीय वनस्पति अनुसंधान संस्थान की ओर से आयोजित पुष्प प्रदर्शनी में शिरकत करने आए बागवानों को

कद्रदान मिले तो मानो उनकी मेहनत सफल हो गई। प्रदर्शनी में भाग लेने वाले 291 प्रतिभागियों को पुरस्कृत किया गया। इनमें से 99 प्रथम, 104 द्वितीय और 88 सांत्वना पुरस्कार शामिल थे। 26 को रनिंग चैलेंज ट्रॉफी प्रदान की गई। प्रदर्शनी में 69 वर्गों के तहत 647 प्रविष्टियों के बीच उत्कृष्टता की जंग थी। दिल्ली के वैज्ञानिक अनुसंधान परिषद के महानिदेशक डॉ.शेखर सी मांडे ने विजेताओं को पुरस्कृत किया। एचएएल को सर्वाधिक पुरस्कारः फैजाबाद रोड के एचएएल को सबसे अधिक 40 पुरस्कार मिले। इनमें 13 प्रथम, 18 द्वितीय और नौ सांत्वना पुरस्कार शामिल हैं। छावनी परिषद को मिले 22 पुरस्कारों में आठ प्रथम, नौ द्वितीय और पांच सांत्वना पुरस्कार थे। टाटा मोटर्स को 19 पुरस्कार मिले

एनबीआरआई में दो दिवसीय गुलाब एवं ग्लेडियोलस प्रदर्शनी शुरू

मोबाइल सेल्फी के लिए बेकरार रहे। सीएसआईआर एनबीआरआई में दो दिवसीय गुलाब एवं ग्लेडियोलस प्रदर्शनी शनिवार से सेंट्रल लॉन में शुरू हुई। दोपहर बाद प्रदर्शनी में लोग जुटे। हालांकि प्रदर्शनी के पहले दिन कंपाते मौसम का असर भी दिखा। 650 प्रदर्शकों से सजी प्रदर्शनी सुबह दस वजे शाम छह वजे तक आम दर्शकों के लिये खुलेगी। शाम को पुरस्कार वितरण होगा। प्रदर्शकों के लिए 26 रनिंग चैलेंज शील्ड, कप, ट्रॉफि यों के लिये 69 प्रदर्शकों से कुल 647 एंट्री आई। जिनमें विभिन्न सरकारी, अर्द्ध सरकारी विभाग, स्वायत्त निकाय, व्यक्तिगत उत्पादक, महिलायें, नर्सरियों के प्रतिभागी शामिल रहे।

दिजताओं के नाम अदर्शनी के सर्वोत्तम गुलाब माल, जेपी तिवारी एचएएल। प्रदर्शनी के सर्वोत्तम एचटी तरंगे गुलाब, महेश कुमार जायसवाल एचएएल अमेठी। प्रदर्शनी के सर्वोत्तम एचटी दुरंगे गुलाब, महेश कुमार जायसवाल एचएएल अमेठी। प्रदर्शनी के सर्वोत्तम एचटी दुरंगे गुलाब, महेश कुमार जायसवाल एचएएल अमेठी। प्रदर्शनी के सर्वोत्तम एचटी प्रत्थ कार्यालय कैंट लखनऊ। प्रदर्शनी के सर्वोत्तम रंगीन धारीदार एचटी गुलाब, महेश कुमार कोरवा, एचएएल अमेठी। प्रदर्शनी के सर्वोत्तम एचटी पीले गुलाब, यनी उपसम होटल क्लार्क अवध। प्रदर्शनी के सर्वोत्तम गुलाबी गुलाब, महेश कुमार जायसवाल एचएएल अमेठी। प्रदर्शनी के सर्वोत्तम भारतीय प्रजनित हाइब्रिड टी गुलाब, महाप्रबंधक एचएएल अमेठी।

आप भी खरीद सकते हैं विभिन्न प्रजातियों के पौधे

दो दिन तक चलने वाली प्रदर्शनी में पहले दिन मौसम का असर भी दिखा। धूप खिली न होने से पहले सत्र में कम संख्या में लोग जुटे। इस दौरान विशेषज्ञों ने तमाम कैटेगरी में सिंगल कट गुलाब, ग्लेडियोलस आदि का निरीक्षण कर बेस्ट एंट्री चुनी। गुलाब के फूलों की माला से संवरे घर, मंदिर, गणपति द्वार की सजावट खास पसंद की गई। पौधों के द्वारा प्रदूषण प्रबंधन स्टाल पर भी लोगों ने रुचि दिखाई। मंडप में एनबीआरआई पवेलियन में गुलाब व ग्लेडियोलस कट प्लावर्स, विकसित प्रौद्योगिकियों एवं हर्बल उत्पादों को भी लोगों ने सराहा। संस्थान की ओर से वनस्पति विज्ञान के किए जा रहे शोध एवं विकास कार्यों की भी प्रदर्शनी लगी। प्रदर्शनी के संयोजक डॉ. एसके तिवारी ने बताया कि आम जनता हेतु पौधों की विभिन्न प्रजातियां यहां बिक्री हेतु उपलब्ध हैं। रविवार शाम 4 बजे औद्योगिक अनुसंधान परिषद दिल्ली के महानिदेशक शेखर सी पांडे मुख्य अतिथि रहेंगे, विजेताओं को पुरस्कार देंगे।

Basic and applied research must be balanced: CSIR DG

Those who lead scientific institutions must ensure a balance between basic and applied research, director general of Council of Scientific and Industrial Research(CSIR) Shekhar C Mande said at an HRD ministry-driven leadership for academicians programme. The event was attended by professors of IIT and heads of department of various institutes. "A basic research that may not appear useful today could be of paramount importance later. Look at 'Raman effect', C V Raman's pioneering work on scattering of light in 1930. At the time, the importance was purely academic. But it turned out to be a significant tool

for analysing the composition of liquids, gases and solids. In 1998, it was designated a National Historic Chemical Landmark by the American Chemical Society in recognition of its significance," Mande pointed out, adding that striking a balance between conventional and applied research was of particular importance for a country like India.

All India Council for Technical Education chairman Anil Sahasrabudhe, who also addressed the future leaders of scientific institutions, stressed on the importance of social networking to tap into the alumni resource. "In today's world, one has to realise the importance of

social platform and power of networking to connect with the alumni who can provide support in different ways.

For any institute to develop, one needs a pool of scientists. The alumni is a key component of this pool. Not only can they bring in resources, they can also provide a dispassionate assessment of the institute by viewing its functioning from a distance," he said.

Networking, Sahasrabudhe said, was also necessary to collaborate with industry, corporates and other institutes."Exchange of knowledge is key to development, not just between institutes in India but between Indian and international institutes," he added.

The AICTE chairman also urged laboratories to step forward and become centres to incubate students' ideas as well as motivate and inspire them. "Give students the opportunity to work in laboratories," he said.

Jamshedpur, Jan. 18: A group of 62 students of Std. IX to XI from Motilal Nehru Public School, Sakchi accompanied by two teachers Mrs. Sampa Banerjee and Mrs. Ritu Sachdeva visited at CSIR-National Metallurgical Laboratory, Jamshedpur and interacted with scientists and research scholars this morning under the aegis of Jigyasa-NML-School Interactive programme. The students were thrilled to visit the laboratory and interact with working group. The programme was scheduled for two and half hours, Dr.P.N. Mishra, Principal Scientist, begin the programme with

welcome address and introduced students with the members of SNIP programme and further, he discussed about NML and its contribution towards the gainful and proper utilization of natural resources such as ores, minerals for developing different types of metals & alloys. Dr. S.K. Mandal, scientist chief and coordinator of the programme, discussed fundamentals of science and its various branches to inculcate interest towards

Evaluation Division, Mr.

analysis of minerals, ores, slag, water.

During the concluding session, teachers and students requested for their next visit to the laboratory for gain more knowledge. Teachers expressed their views and was satisfied to know about the consistent effort and research emphasis given in various sectors for the ultimate development of our society. They also extend thanks to the Ministry of Human Resource Development, Govt.of India, to launch "Jigyasa Programme" tie up with council of Scientific & Industrial Research and they were extremely delighted to visit the National Metallurgical Laboratory, Jamshedpur.

CSIO transfers technology to industry TRIBUNE NEWS SERVICE 3D PRINTED PATIENT SPECIFIC MEDICAL IMPLANTS gical models, surgical tools,

CHANDIGARH, JANUARY 17 The Central Scientific Instruments Organisation (CSIO) here today transferred the knowhow for manufacturing "3D Printed Patient Specific Medical Implants" to a private industry for commercial production and marketing. Patient Specific Implant (PSI) is required when current commercially available implants for the site are either not available or do not fulfil the anatomical requirement. In those cases, PSI is designed for one particular patient from the CT scan data and then manufactured using 3D printing technology using

The PSI was developed at the CSIO's Innovative Additive Research and Manufacturing Laboratory (iARM), which is having all facilities related to design, manufacturing and testing of standards as well as patient-specific orthopaedic and maxillofacial implants, surgical models, surgical tools, custom-made prosthetics, tissues engineering and organ printing.

gical models, surgical tools, custom-made prosthetics, tissues engineering and organ printing. Vijay Kumar Meena, Principal Scientist, CSIO, who has developed the knowhow of the PSI, said he and his team were working on development of technologically advanced 3D printed implants in India. The patient specific implants developed in iARM Lab were successfully implanted in patients at prestigious government and private medical institutes. The medical applications of 3D printing are continuously increasing day by day. Digital healthcare, including imaging-based technologies such as CT scan, MRI and ultrasound and medical implants, will sooner or later become routine.

arise due to trauma, diseases such as cancer or fungal infection or revision surgeries. The PSI is also beneficial for joint salvaging surgeries where human joints are good but the bone near joints is infected or traumatised. The CSIO has developed the technology and expert-

bearing anatomical sites. Prof RK Sinha, Director, CSIO, said the PSI was developed at the CSIO's Innovative Additive Research and Manufacturing Laboratory (iARM), which is having all facilities related to design, manufacturing and testing of standards as well as patient-spe-

titanium or other biocompatible materials. The requirement may load bearing and non-load maxillofacial implants, sur-

CSIR-CCMB workshop on genome for providing personalised healthcare

17th January, 2020

This workshop is arranged by the Indo-US Science and Technology Forum, supported by the Department of Science and Technology, India, and Department of State, USA, with an aim to create fruitful collaborations between the two countries. Director CCMB, Dr Rakesh K Mishra says, "Variation in our population Indian and US researchers, who work to and differential susceptibility to diseases and understand the genetic basis of diseases response to treatment methods have been among various ethnic populations from known. With genome information, we can different parts of the world, participated in a now think of precision and personalized workshop organised by CSIR-Centre for approach for more effective and economical Cellular and Molecular Biology (CCMB), approaches to healthcare. This meeting brings Hyderabad. The workshop focussed on experts from India and the US to discuss the understanding genome information in a latest findings. This is likely to help us finebetter way. Improved information on genome tune our way forward towards genomecan help fine-tune genome-assisted assisted healthcare." These researchers believe healthcare, and could even lead to precise, that one size doesn't fit all - especially in personalized, more effective and economical healthcare. Much of it depends on the genetic approaches to healthcare. The three-day make-up and the surroundings, which modify workshop, started on January 16, was the genes of a person – what is called as the attended by around 200 researchers, many of epigenetics. As genetics of populations in whom are promising PhD scholars from different parts of the world differ from each research institutes, universities, hospitals and other, there is immense interest among life science companies in India and the US. researchers and governments to look at

genetic details of many non-communicable diseases. Researchers are deliberating on genetic and epigenetic basis of different forms of cancer, diabetes, heart and neurological diseases in South Asia and the US. It will also have focused discussions on the promise of personalized medicine, and advancements in technologies to make it possible.

Dr Thangaraj from CCMB and Dr Keshav Singh from the University of Alabama, Birmingham – the convenors of the meeting from the two countries – mention that most of the data that as of now is based on European populations. For the field of personalized medicine to progress, it is imperative to understand population-specific genetics.

CSIR-IMTECH workshop on fermentation basics

The CSIR-Institute of Microbial Technology (IMTECH) conducted a five-day workshop on the fundamentals of Fermentation Process Development. The workshop immensely helped participants acquire fundamental understanding of the relationship between process design and product quality in fermentation. Twenty one participants from different academic and research institutes as well as from industry were part of this workshop, which started from January 13 and concluded on January 17. This workshop, apart from building the knowledge base of participants on the subject, is likely to help increase employability and entrepreneurial potential of the participants in the biotechnology and

Dr. Anirban Roy Choudhury, the co-ordinator of the workshop, said that the participants were given hands-on training in pilot-scale fermenters. The participants were given exposure to critical process parameters needed to achieve a robust fermentation process. The major topics covered during the workshop included microbial cell growth and product formation kinetics, the critical components of an industrial bioreactor, and scale-up and downstream processing of fermentation processes. The participants were mentored by the experts in the area of biochemical engineering. The workshop was organized by the Biochemical Engineering Research and Process Development Centre (BERPDC) under its 'Skill Development' mandate to impart and upgrade skills of the young researchers and students in Fermentation Technology.

Dr Sanjay Kumar, Director, CSIR-Institute of Himalayan Bioresource Technology (IHBT), Palampur, who was also the chief guest, inaugurated the workshop on January 13 and Prof U. C. Banerjee, Head, Pharmaceutical Technology, National Institute of Pharmaceutical

Education and Research (NIPER), Mohali, gave the inaugural lecture on "Mass transfer in bioreactors". Dr Manoj Raje, Acting Director, CSIR-IMTECH, while welcoming the participants gave a brief background of CSIR-IMTECH & BERPDC and said, "The major objective of the workshop will be to impart training on fermentation principles and engineering fundamentals of growing microorganisms in a bioreactor to express industrially important biomolecules."

CSIR-IMTECH, established in 1984, is a national centre for excellence in microbial sciences. IMTECH's vision is to discover and develop translational products and new drugs to address key unmet medical needs.

Need to conserve fuel for nt'l development: Uniyal

Considering the huge amount spent on importing the bulk of the nation's crude oil demand, citizens should contribute to the welfare of the nation by ensuring their bit for conservation of fuel. The State's Agriculture and Horticulture minister Subodh Unival said this while inaugurating the Saksham Mahotsav at CSIR-Indian Institute of Petroleum here on Thursday.

The programme organised by Petroleum Conservation Research Association (PCRA), Ministry of Petroleum and Natural Gas along with oil industries is being observed from

January 16 to February 15 with the theme 'Save Fuel and Energy to Save the Environment'.

Addressing the gathering, the cabinet minister said that India is importing 80 per cent of its crude oil and spending a huge amount of money for this. Appreciating the efforts made by PCRA and the CSIR-IIP in conserving the energy, he appealed the public to give their best to save the fuel for the progress of country. He emphasised that such type of programmes will educate the people to save energy.

Expressing his views on the occasion, the chancellor of UPES, SJ Chopra said that as per recent studies, the energy requirement will double by the year 2040 and that it is essential to save energy. He also shared some tips for conservation of energy.

Later, the CSIR-IIP director Anjan Ray interacted with the students of various schools and discussed about the fuel and its conservation related solutions.

State level coordinator of oil industry Manoj Jayant informed about the different activities to be conducted during the month and also gave some useful tips to save energy.

An exhibition was also organised wherein room temperature bio-diesel, electric vehicle and PNG burner developed by CSIR-IIP were showcased. A human chain was formed and a Saksham vehicle was also flagged off on the occasion.

TRIBUNE NEWS SERVICE

SOLAN, JANUARY 16 In a bid to save rare herbs, the Sirmaur district administration will coordinate with Palampur-based CSIR-Institute of Himalayan Bioresource Technology to undertake cultivation and development of medicinal and aromatic crops.

Sirmaur DC RK Pruthi said MoUs would be signed with the institute for the development of medicinal and aromatic crops, rare, threatened and endangered plant species as well as bamboo plantation-related interventions.

He said discussions had already been held with the scientists from the institute for undertaking research and development works over these issues. Apart from this, enterDiscussions has already been held with the scientists from the institute for undertaking research and development works

prise development for herbal incense cones, wine making from peach and cereal and millet bars making activities would also be part of these MoUs. He said the CSIR-IHBT would also explore scope for

making home-compost machines that could help deal with the problem of garbage management in the district.

He said Navratan Theme

Pruthi said one lakh repellent plat saplings of different varieties would be planted in each development block. Apart from this, one lakh lemon saplings would also be planted under MGN-REGA. would be mad

Park would also be established that would have nine components — Triveni, Panchvati, air purifier, water purifier, mosquitorepellent plants, snakerepellent plants, dant van, fodder plants and kitchen

As part of his "Vision-2020", the Deputy Commissioner said efforts would be made to conserve the environment and new interventions such as zero waste tourist centre having traditional and modern kitchen, toilet, cafe, wi-fi, solar system and rooftop rain harvesting system would be established for tourists and visitors at Bag Pashog.

The Centre would also have mahila mandal store where they would sell domestic and handmade products and local products.

CSIR-CSIO

CSIO has been sharing the knowledge of analytical equipment for these countries under Indian Technical and Economic Cooperation Programme (ITEC) category. Such programmes boost international relations and the participants get both cultural technical and knowledge the country. These participants were trained on the operation and maintenance aspects of variety of analytical equipment. The biomedical department of CSIO is conducting research and development on anesthesia workstation, above elbow prosthesis, electronic knee, batch chemistry analyzer, control system for micro-level motions etc. Besides, on site and inhouse test/calibration services for medical instru-

ભાવનગરની સેન્ટ્રલ સોલ્ટ ઈન્સ્ટીટ્યૂટની મુલાકાત લેતા સોલાપુર યુનિવર્સિટીના વિદ્યાર્થીઓ

સમુદ્રી પર્યાવરણીય સંશોધન અને મરીન સાયન્સના સંશોધનમાં અનેક તક ઉપલબ્ધ CSMCRIના સિનિયર પ્રિન્સિપલ સાયન્ટિસ્ટ ડો. રવિક્રમાર થોરાટ દ્વારા વિદ્યાર્થીઓને ઊંડાણપૂર્વક અપાયેલ માહિતી કાઉન્સિલ ઓફ સાયન્ટિફિક એન્ડ ઇન્ડસ્ટ્રીઅલ રિસેચ (CSIR) દ્વારા 'જીજ્ઞાશા' પોસામ અંતગંત હેઠળ

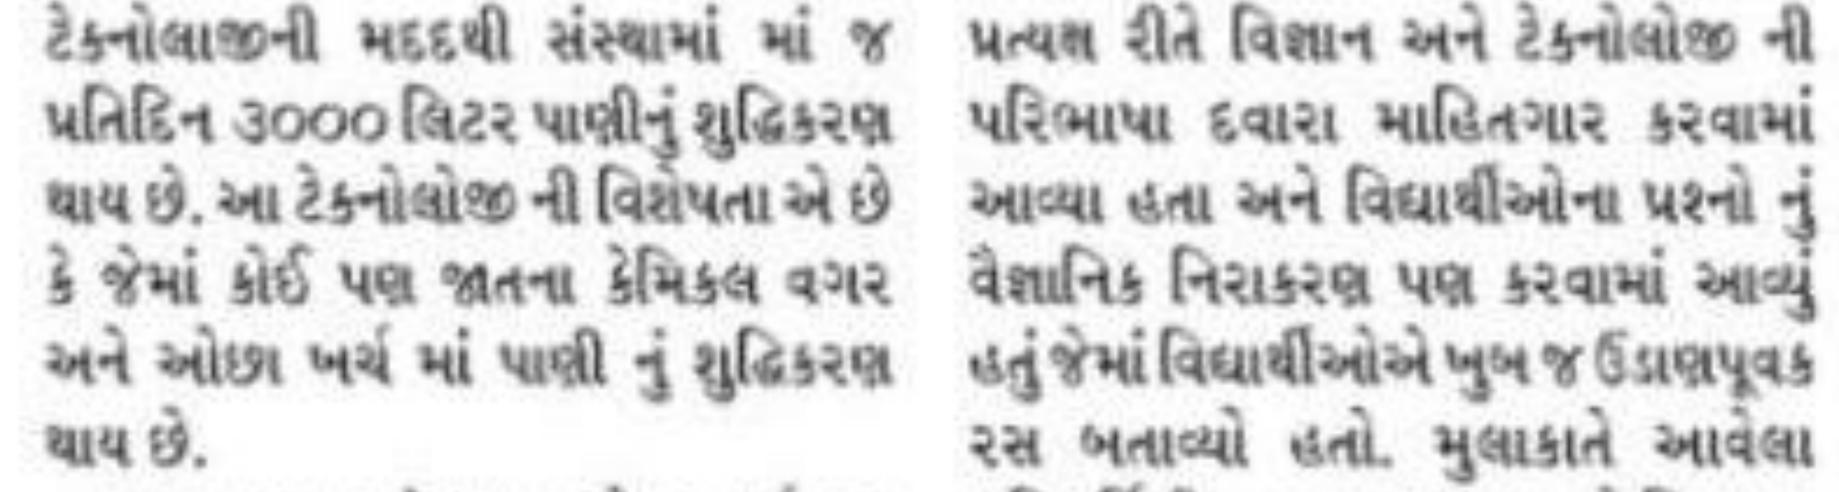

પુણ્યશ્લોક અહિલ્યાદેવી હોલ્કર સોલાપુર યુનિવર્સિટીના પોસ્ટ ચજ્યએટના વિદ્યાર્થીઓ તથા પાધ્યાપકો તાજેતરમાં ભાવનગરમાં આવેલ CSIR ની પ્રયોગશાળા એટલે સેન્ટ્રલ સોલ્ટ અને મરીન કેમિકલ્સ રિસેચ ઈન્સ્ટિટ્યુટ (CSMCRI) ની મુલાકાતે આવ્યા હતા.

CSMCRI-11 સિનિયર પ્રિન્સિપાલ સાયન્ટિસ્ટ ડો. રવિક્રમાર થોરાટ દ્વારા વિદ્યાર્થીઓને સમુદ્રી પર્યાવરણીય સંશોધન અને મરીન સાયન્સમાં આવનારી સંશોધન તકો વિષે ઊંડાણ પૂર્વક માહિતી આપવામાં આવી હતી. આ ઉપરાંત, વિદ્યાર્થીઓને વાતાવરણમાં થતા હવાના પ્રદૂષણ વિશે ખુબ જ ઉપયોગી માહિતી આપવામાં આવી હતી. જેમાં

વાહનો અને ઔદ્યોગિક પ્રદુષણ અને તેના લીધે માનવજાત અને જીવ સુષ્ટિ પર થતી અસરો વિશે ઊંડાણપૂર્વક વૈજ્ઞાનિક મ્યુનિસિપલ ગંદાપાણી, ઘરેલું ગટર, માહિતી આપવામાં આવેલ હતી. આ રિફ્રાઇનરી ફ્લુન્ટ્સ અથવા લેન્ડફ્લિ કે જેમાં કોઈ પણ જાતના કેમિકલ વગર ઉપરાંત હવાનું પદ્ધણ માપવામાં ઉપયોગ થતા ઇન્સ્ટ્રમેન્ટનો લાઈવ ડેમો પણ બતાડવામાં આવ્યો હતો. what the CSIR -CSMCRI GIRL બનાવામાં આવેલ કન્સ્ટ્રક્ટેડ વેટલેન્ડ વિશે

હતા. આ કન્સ્ટ્રક્ટેડ વેટલેન્ડ્સ એ ક્લિમ વેટલેન્ડ છે જેનો ઉપયોગ સપાટીના પાણી, લિચેટમાં કાર્બનિક, અકાર્બનિક દૂષણોની અને ઓછા ખર્ચમાં પાણી નું શુદ્ધિકરણ હતું જેમાં વિદ્યાર્થીઓએ ખુબ જ ઉડાણપુવક શહિકરણ માટે થાય છે.CSMCRI થાય છે. ઈન્સ્ટિટ્યૂટ દારા ઉત્પન થતા સીવેજ CSMCRI સંસ્થાના સોલ્ટ ઇનર્મ પર વોટર ને સંસ્થામાં માં શુદ્ધ કરી તે પાણી ને

વિદ્યાર્થીઓને મીઠાના શુદ્ધિકરણ અને ધુલાપ દારા વિદ્યાર્થીઓને આવી તક ફરી ઉપયોગ માં લય શકાય તે માટે આ બીજી વિવિધ CSMCRI દવારા કાર્યરત આપવા બદલ CSMCRI સંસ્થાનો ખુબ

પ્રત્યક્ષ રીતે વિજ્ઞાન અને ટેકનોલોજી ની આવ્યા હતા અને વિદ્યાર્થીઓના પ્રશ્નો નું વૈજ્ઞાનિક નિરાકરણ પણ કરવામાં આવ્યું રસ બતાવ્યો હતો. મુલાકાતે આવેલા યુનિવર્સિટી ના પ્રાધ્યાપક ડો.વિનાયક

વિદ્યાર્થીઓને માહિતગાર કરવામાં આવ્યા પ્લાન્ટ બનાવામાં આવ્યો છે. આ ટેકનોલોજી પર વિઝિટ કરી ને વિદ્યાર્થીઓને આભાર વ્યક્ત કર્યો હતો. હવાનું પ્રદ્ધણ થવાના મુખ્ય કારણો,
