CSIR-NEERI to partner with slaughter houses, dairy industries to protect environment

CSIR-NEERI

Industry-Institute Interactive & Business Meet (I3BM) Slaughterhouse and Dairy & Milk Processing Industries 1Звм Organized by CSIR-NEERI 30 अगरत / August 2018

Nagpur: CSIR-National Environmental NEERI) organised a business meet in the NEERI Auditorium on August 30, 2018 to strengthen the partnership slaughterhouses and dairy industries for environmental protection. The business meet was inaugurated by the Chief Guest Dr. Ashish M. Paturkar, Vice Chancellor, Maharashtra Animal & Fishery Sciences University (MAFSU), Nagpur; Guest of Honour Shri R.K. Rathod, Sr. Manager, Kumar, Director, CSIR-NEERI. Dr. N.N. Rao, Chief Scientist and Dr. Girish Pophali,

30th August, 2018

Principal Scientist were also present on this occasion. While addressing the participants, Prof. Paturkar said that there is a need to assess the status of our country in terms of water consumption and waste management at slaughterhouses and dairy industries. These industries should treat the wastewater before discharging into the environment, he added. He advocated that though environmental norms are enough, the change in mindset is essential to protect our Engineering Research Institute (CSIR- environment from these industries. He urged the scientists to work on reduction of water consumption and effective treatment processes in slaughterhouses and dairy industries. He pointed out that there is a discrepancy in capacity of slaughterhouses and waste treatment systems. He advised the scientists and industries to design the compact effluent treatment plants (ETPs) to get maximum treatment with minimum cost. The industries should also make profit Mother Dairy, Nagpur; and Dr. Rakesh through recycling of the waste from slaughterhouses and dairy industries, he suggested.

Shri Rathod said that the dairy industry consumes a lot of water. Therefore, efficient water use and effluent management by the dairy processing industry are very much needed, he added. A proper ratio of milk and water should be maintained by the industry, as the milk already contains 80 percent water, he said. He stressed on the need to use more anaerobic treatment systems for methane production from dairy wastewater which can be used as a biofuel. He urged the scientists to explore more environment-friendly processes for the treatment of dairy wastewater.

Earlier, Dr. Rakesh Kumar, Director, CSIR-NEERI in his welcome address said that CSIR-NEERI has provided the solutions to various industries for waste water treatment and management. He informed that the Institute played a vital role to set up common effluent treatment plants (CETPs) in Rajasthan, Delhi and Punjab. He advised the participants to understand the processes and customise at the industry and spread the outcome of this business meet to consultants and practitioners. This business meet illuminated the issues like segregation, processing, recovery of value-added products from the waste along with the implementation of policies.

Dr. Girish Pophali, Principal Scientist gave an overview of this business meet. Dr. A.K. Bansiwal, Head, Business Development Group briefed about the significant achievements of CSIR-NEERI and explored business opportunities. The representatives from State Pollution Control Boards (SPCBs), Central Pollution Control Board (CPCB), Urban Local Bodies (ULBs), industries and research institutions participated in this event. The scientists Er. Pravin Manekar and Dr. Sukdeb Pal were also involved in organizing this event. Dr. (Mrs) Rima Biswas Mondal, Scientist conducted the proceedings.

आइआइपी ने दस साल शोध के बाद तैयार किया बायोपयूल

सुमन सेमवाल • देहरादून

बायोजेट फ्यूल से ऐतिहासिक उड़ान को सफल बनाने में भारतीय पेट्रोलियम संस्थान (आइआइपी) को दस वर्ष का समय लगा। आइआइपी के वरिष्ठ वैज्ञानिक डॉ. अनिल सिन्हा ने बताया कि 2008 में ब्रिटेन की वर्जिन अटलांटिक एयरवेज ने कोकोनट ऑयल से हवाई जहाज उड़ाने का प्रयोग किया था। उस समय सामान्य जेट फ्यूल में 20 फीसद कोकोनट ऑयल मिलाया गया था। इसी के बाद आइआइपी ने भी तय किया कि लिया गया।

15 दिन में शुरू होगा अधिक उत्पादन आइआइपी के वरिष्ठ वैज्ञानिक डॉ. सिन्हा के अनुसार 15 दिन में संस्थान से विमानों में 10 बायोजेट पयूल प्लांट तैयार कर फीसद बायोजेट लेगा। इसकी क्षमता २०० लीटर पयूल का प्रयोग शुरू करने का सुझाव प्रतिदिन होगी। इसके लिए छतीसगढ़ से प्रतिमाह 1000 लीटर जैट्रोफा का सामान्य बायोपयूल मंगाया जा रहा है।

शोध के दौरान ही इंटनेशनल एविएशन ऐसे में भविष्य की प्रतिबद्धताओं के से उत्प्रेरक (कैटलिस्ट) के माध्यम लीटर है।

जाने की जरूरत है। 2008-09 से ही यह कह चुका था कि 2017 से विमानों दिया है। वहीं, बायोजेट फ्यूल तैयार जा सके। अभी जो फ्यूल तैयार हो रहा (आइआइपी) के अधिकारियों के साथ स्पाइसजेट ने अपने सभी विमानों में शोध शुरू करने के करीब 10 साल के में 10 फीसद बायोजेट फ्यूल का प्रयोग करने की प्रक्रिया पर प्रकाश डालते हैं, उसकी कीमत करीब 120 रुपये | लगातार संपर्क में हैं। भीतर इस उपलब्धि को हासिल भी कर शुरू किया जाना चाहिए, जो कि भविष्य हुए डॉ. सिन्हा बताते हैं कि इसके लिए प्रति लीटर आ रही है, जबकि सामान्य आइआइपी के वरिष्ठ वैज्ञानिक डॉ. लक्ष्य रखा है। आइआइपी के अनुसार, में अनिवार्य भी कर दिया जाएगा। सामान्य बायोफ्यूल (जैट्रोफा ईंधन) एविएशन फ्यूल की दर करीब 70 रुपये | अनिल सिन्हा ने बताया कि वायुसेना को स्पाइसजेट को प्रतिदिन करीब 10 हजार

किया गया। साथ ही इसके हाइड्रोकार्बन गई। क्योंकि ऑक्सीजन की मौजूदगी व हाइड्रोकार्बन की अधिकता के चलते जागरण संवाददाता, देहरादून : भारतीय रिफाइनरी लगाने पर विचार कर रहे हैं। रहता है।

में भी काम करना शुरू कर दिया है कि उत्पादन करने पर है। इसके लिए सेना स्पाइसजेट भी लगाएगी बायोजेट फ्यूल की दिशा में कदम बढ़ाए ट्रांसपोर्ट एसोसिएशन (आइएटीए) भी लिहाज से भी देश ने बड़ा कदम बढ़ा बायोजेट फ्यूल की लागत को कम किया के अधिकारी भारतीय पेट्रोलियम संस्थान रिफाइनरी : निकट भविष्य में

से ऑक्सीजन को अलग किया गया। इसके लिए मॉलीक्यूल्स का ब्रेकडाउन लड़ाकू विमानों में 10 फीसद बायोजेट की चेन को काटकर उसकी ब्रांचिंग की गई। क्योंकि ऑक्सीजन की मौजदगी

ऐसा ईधन कम तापमान में जमने लगता वायुसेना अपने फाइटर प्लेन में सामान्य इसके अलावा अधिक मात्रा में बायोजेट है, जबिक कैटलिस्ट प्रक्रिया के बाद तैयार | ईधन के साथ 10 फीसद बायोजेट पयूल पयूल तैयार करने के लिए वायु सेना ने बायोजेट फ्यूल माइनस 47 डिग्री सेंटीग्रेड का प्रयोग भी करेगी। रक्षा मंत्रालय से के तापमान में भी सामान्य अवस्था में ऐसे निर्देश सेना को मिले हैं। लिहाजा, इतनी ही राशि काउंसिल ऑफ साइंटिफिक इसके बाद अब वायु सेना का फोकस एवं इंडस्ट्रियल रिसर्च (सीएसआइआर) आइआइपी के वैज्ञानिकों ने इस दिशा अधिक मात्रा में बायोजेट फ्यूल का से प्राप्त हुई है।

लक्ष्य मिलने के बाद सेना के अधिकारी लीटर बायोजेट फ्यूल की जरूरत पड़ेगी।

पांच करोड़ रुपये संस्थान को दिए हैं।

Right time for JK Tyre to enter field of aerospace applications: NAL Director

CSIR-NAL

NAL chief Singhania Elastomer and Tyre Research 29th August, 2018

Institute (HASETRI), on Tuesday, Mr. Jadhav said a lot of rubber and elastomer components used in the aerospace industry in India are imported from foreign countries. HASETRI, he said, had emerged as one of the foremost institutes in elastomer and rubber industry in the country during the last 25 years, and it was the right time for JK Tyre to enter the field of aerospace applications and make an impact. He pointed suggests CSIR's out that aerospace industry was growing at a collaboration with JK Tyre's R&D rapid pace in the country with companies in centre Jitendra Jadhav, Director of Bengaluru like NAL building 19-seater and National Aerospace Laboratories (NAL), a 70-seater aircraft, besides the Light Combat constituent of Council of Scientific and Aircraft (LCA) Tejas. Billions of dollars are Industrial Research (CSIR), has mooted spent on importing elastomer and rubber the idea of CSIR collaborating with JK products required by the aerospace industry, Tyre's R&D institutes for aerospace he said. CSIR is working in the areas of applications. Speaking at the inauguration agriculture, nutrition, biotechnology, of JK Tyre's new global research and aerospace, health, polymer and technology centre in Mysuru — Raghupati petrochemicals, he said and hoped that the Singhania Centre of Excellence needs of the country can be met by working (RPSCOE), which is part of Harishankar together with private research institutions like JK Tyre.

Earlier, the RSPCOE was inaugurated by Chief Minister H.D. Kumaraswamy, who described JK Tyre as another feather in the cap of Mysuru. Chairman and Managing Director of JK Tyre Raghupati Singhania said JK Tyre was committed to providing the latest in tyre technology to its customers. He said the Global Research and Technology Centre is equipped with sophisticated facilities for advanced material research, testing, computational mechanics, vehicle dynamics and tyre testing.

TNAU inks pact with CIMAP for Aroma mission

Coimbatore, Aug 28 (UNI) Tamil Nadu Agricultural University (TNAU) on Tuesday signed a Memorandum of Understanding with the Central Institute of Medicinal and Aromatic Plants (CIMAP), in the presence of TNAU Vice Chancellor Dr K Ramasamy and CIMAP Director Dr A K Tripathi.

A TNAU press release said here that the CIMAP, Lucknow is engaged in research and development activities in the area of cultivation and processing of medicinal and aromatic plants in the country.

Both CIMAP and TNAU have agreed for the implementation of CSIR and CIMAP's Aroma Mission and phytopharma projects and rural technologies in the state of Tamil Nadu. Further, it has also agreed to take up joint Research and Development (R&D) projects in the areas of mutual interests.

Based on the agreement, CSIR and CIMAP will provide quality planting material of identified aromatic crops to the farmers in the first year for mutually agreed acreage, besides providing processing facility (distillation unit)

of appropriate capacity, depending on strategic requirement or the area under cultivation at farmer's field and facilitating marketing or sale of the produce.

The MoU will benefit the farmers of Tamil Nadu since there will be a regular follow up supervision of cultivation, processing and marketing in the state.

The MoU will also facilitate the scientists and students to use the laboratory at CSIR and CIMAP for the research. Also, the farmers in Tamil Nadu will get a continuous supply of quality planting material with improved varieties of medicinal and aromatic crops, who will now get higher value for the raw material

and essential oil.

This memorandum is valid for a period of three years from this date which will be renewed further for a mutually agreed period, the release added.
