Letter of Consent

Dear all, Respected Members of CSIR and DAAD Exchange Program,

I am Dr. Ulf Kahlert, University Professor in Molecular and Experimental Surgery, Otto-von-Guericke University Magdeburg, Germany. Dr. Shruthy Suresh Aggarwal, a scientist at CSIR-IGIB is submitting an application for the CSIR -Daad Exchange program and I am happy to be listed as the German counterpart for jointly implementing the research project in this proposal. I guarantee that we will provide the workplace for Dr. Aggarwal during this stay. We also consent that the German host plans to conduct a reciprocal visit to India. With this letter, I confirm that I would be happy to host her for a duration of need/interest in my lab so she can learn about our work with patient biobanking, patient-derived organoids in cancer and jointly help us execute the research proposed in this proposal.

Should you have any questions, do not hesitate to contact me.

Thank you,

Ulf Kahlert
Universitätsklinikum Magdeburg A.ö.R.
