CIMAP researchers develop AI-based solution to detect adulteration in medicinal plants

CSIR-CIMAP

29th August, 2025

Researchers at the CSIR-Central Institute of Medicinal and Aromatic Plants (CSIR-CIMAP) in Lucknow have introduced a groundbreaking AI-based solution to tackle food fraud and adulteration in India's natural medicine industry.

Led by senior scientist CH Ratnasekhar, the team developed a machine learning-guided metabolomic fingerprinting technique to ensure the authenticity of botanicals like turmeric, ashwagandha, basil, and others. Published in the journal 'Food Chemistry', this innovative method combines artificial intelligence with high-resolution mass spectrometry to analyse the unique chemical fingerprints of these plants.

The technique boasts over 98% accuracy in identifying the geographical origin, variety, and specific plant parts, while also detecting adulterated samples. This cutting-edge method ensures the authenticity of valuable botanicals, safeguarding consumer trust and the livelihoods of Indian farmers. "By comparing genuine samples with those available in the market, the researchers have built robust models that boast over 98% accuracy in identifying the geographical origin, variety, and specific plant parts...

St. Joseph Convent School's students explore science at CSIR-NML Jamshedpur

CSIR-NML

29th August, 2025

The CSIR-National Metallurgical Laboratory (NML), Jamshedpur, organized a laboratory visit for 86 students and 7 teachers from St. Joseph's Convent High School, Ghatsila, under the CSIR-Jigyasa Virtual Laboratory project. The programme aimed at fostering scientific curiosity and introducing young learners to the world of research and innovation.

The day began with an inaugural session where Dr. Sandip Ghosh Chowdhury,

Director of CSIR-NML, delivered the welcome address. He highlighted NML's role in India's growth through 75 years of technological development and pioneering contributions. This was followed by an address from Dr. Sarmistha Sagar, Chief Scientist and Head of IMDC, who spoke on the institute's significant research and development work. Later, Dr. Animesh Jana, Senior Scientist at IMDC, explained the objectives of the Jigyasa ...

Four herbal products created by CIMAP to hit market shortly

CSIR-CIMAP

29th August, 2025

Four herbal products developed by Central Institute of Medicinal and Aromatic Plants (CIMAP) will be available in the markets soon.

The institute has transferred the technology of its herbal shampoo Habisoft; floor disinfectant Flomop; pain relief balm Panechhu; and an aroma-therapeutic, anti-inflammatory pain-relieving oil Relaxomap, to a Haryana-based company for mass production.

The technology was transferred during the institute's annual day celebration on Thursday.

Mayor Sushma Kharakwal inaugurated the event along with CIMAP director Prabodh Kumar Trivedi. Kharakwal commended the institute's significant contributions to the field of medicinal and aromatic plants, emphasising the growing global interest in natural medicines and cosmetics due to concerns over synthetic alternatives."There is a need for standardisation in herbal medicines to build public trust and encourage further research ...

Directors CSIR-IIIM & Horticulture Jammu reviews Tissue Culture, Virus Indexing, Bio-Control Laboratories at Mega Fruit Plant Nursery, Chakroi

CSIR-IIIM

30th August, 2025

Dr. Zabeer Ahmed, Director, CSIR-Indian Institute of Integrative Medicine (IIIM), Jammu, and Sh. Gul Sayed, Director Horticulture, Jammu Division, UT of Jammu & Kashmir, jointly conducted a comprehensive review of the Plant Tissue Culture, Virus Indexing, and Bio-Control Laboratories established at the Mega Fruit Plant Nursery, Chakroi, RS Pura, Jammu, here today.

These state-of-the-art laboratories have been strategically established under HADP of APD of Jammu & Kashmir Govt. with the objective of producing disease-free planting material through tissue culture-based mass multiplication of superior fruit varieties while maintaining genetic uniformity. The virus indexing laboratories are equipped with advanced equipment for comprehensive testing of plant material for the presence of viruses through ELISA (Enzyme-Linked Immunosorbent Assay) and Real-Time PCR technologies. The bio-control laboratories are designed for the production of eco-friendly bio-pesticides ...

Honey on high

CSIR-IIIM

31st August, 2025

The scent of lavender fills the walkways across 60 hectares of the Field Station, Bonera, in south Kashmir's Pulwama. The lavender bushes are protected by a tall tree line with thick green foliage at the Council of Scientific and Industrial Research's Indian Institute of Integrative Medicine (CSIR-IIIM), an affiliate of its Jammu centre. Amid its exotic plants sections are geranium, rosemary, and roses, even blue Italian hibiscus trees. Here, the institute has begun to produce mono-floral lavender

honey for the first time ever. This has paved the way for India to join a few Western countries like France, Spain, Italy, Bulgaria, England, and Turkey to enter the global market of premium, sought-after lavender honey. A kilogram of this sells between ₹5,000 and ₹6,000 in the global market, six times higher than the price of regular organic honey.

The journey to producing mono-floral lavender honey started in June of 2022 when Shahid Rasool, the principal scientist at CSIR-IIIM's Field Station in Pulwama observed an increasing number of honey bees foraging for nectar in the vast lavender fields ...

4 Day Training Program for Tribal Farmers concludes at CSIR-IIIM

CSIR-IIIM

1st September, 2025

Under the Department of Science & Technology (DST) sponsored Science, Technology & Innovation (STI) Hub Project, the CSIR-Indian Institute of Integrative Medicine (CSIR-IIIM), Jammu has successfully completed the Four-Day Hands-on Training Programme aimed at empowering tribal farmers through scientific training in aromatic crops, value addition, and sustainable livelihoods.

Dr. Zabeer Ahmed, Director, CSIR-IIIM while speaking at the valedictory function said that CSIR-IIIM Jammu endeavoured to work in the pursuit of a game changer campaign “Start-Up India, Stand-Up India”, unveiled by Prime Minister, Narendra Modi during his Independence Day address on August 15, 2015, to promote entrepreneurship at grass root level which was further steered by Dr Jitendra Singh, Union Minister of State (Independent Charge) for Science & Technology; MoS PMO, Personnel, Public Grievances, Pensions, ...

CFTRI's five-day health check-up camp screens 300 persons

CSIR-CFTRI

1st September, 2025

A five-day extensive health check-up camp at Council of Scientific & Industrial Research – Central Food Technological Research Institute (CSIR-CFTRI), Mysuru, as part of the CSIR Health Cohort Project — a multi-institutional, five-year-long national initiative covering all CSIR laboratories across India.

The project aims to develop clinically useful, personalised risk predictions for various communicable and non-communicable diseases. Over 10,000 CSIR employees, including retirees and their spouses, have been identified as subjects for the study. Launched in 2022, the project completed its first phase at CSIR-CFTRI in February 2023.

Participants in the camp underwent extensive medical tests, including complete blood count (CBC), liver and kidney function tests and blood sample collection for detailed biochemical markers and advanced omics investigations such as genomics, proteomics, metabolomics, cytokine profiling and telomere length measurement. Imaging and diagnostic scans — including spirometry, ECG, body composition analysis, liver scans...

संबलपुर में शहद की खेती से आदिवासी महिलाओं का सशक्तीकरण

CSIR-NBRI

3rd September, 2025

ओडिशा के संबलपुर में रहने वाली एक आदिवासी महिला पहले घर के कोने में बैठकर या जंगल से वनोपज इकट्ठा करके बाजार में बेचकर कुछ पैसे कमाती थीं. हालांकि, बाद में उसने कुछ नया करने का सोचा और सबुज सनातनपाली किसान उत्पादक संगठन (FPO) की मदद से उसने मधुमक्खी पालन शुरू किया. मधुमक्खी पालन करने वाली संबलपुर के जुजुमुरा ब्लॉक के मुसाकनी गांव की 30 आदिवासी महिलाओं ने आत्मनिर्भर बनकर सफलता की कहानी लिखी है. जुजुमुरा ब्लॉक की कंसार पंचायत के अंतर्गत

मुसाकनी गांव में लगभग 30 आदिवासी परिवार रहते हैं. शहर से दूर मुसाकनी गांव प्राकृतिक सुंदरता से भरपूर है. हालांकि, विकास इस गांव से कोसों दूर है. अब इस गांव में मधुमक्खी पालन ने गांव की एक नई पहचान बनाई है. स गांव में स्थानीय स्वयं सहायता समूह की महिलाओं द्वारा 'सबुज सनातनपाली' एफपीओ की मदद से CSIR फ्लोरीकल्चर मिशन परियोजना के तहत पिछले साल मधुमक्खी ...

Long-term infra and public-welfare projects among NDMC initiatives for preparation for monsoon

CSIR-CRRI

3rd September, 2025

The fourth meeting of the New Delhi Municipal Council (NDMC), presided over by Delhi Minister Parvesh Sahib Singh on Wednesday deliberated and approved a wide range of measures that underline its commitment to ensuring robust civic preparedness with modern infrastructure and long-term welfare for the residents.

The agenda of the meeting reflected both immediate priorities such as monsoon preparedness and forward-looking initiatives aligned with the Prime Minister Modi's vision of 'Viksit Bharat @2047'

Over monsoon preparedness, a round-the-clock control room, and emergency response teams have been activated to respond swiftly to rain-related emergencies.

De-silting of major drains across NDMC areas has been carried out to mitigate flooding risks, and a state-of-the-art sump with a capacity of 5 lakh litres has been installed at Purana Qila to address chronic water-logging.

A project worth Rs 13.10 crore has been approved for cleaning the Kushak and Ring Road drains using advanced robotic technology, ensuring efficiency and durability in the system.

It was also mentioned that 79 major roads in the NDMC area—including stretches near the Parliament, Prime Minister's residence, Rashtrapati Bhavan, and Connaught Place — will undergo reconstruction at an estimated cost of Rs 89.75 crore.

This project will be executed in collaboration with CSIR-CRRI, for which an MoU ...

विश्व का मेंथॉल मिंट हब बना यूपी, CSIR-CIMAP लखनऊ द्वारा विकसित की 12 किस्में होंगी निर्यात

CSIR-CIMAP

4th September, 2025

सीएसआईआर-सीमैप (केंद्रीय औषधीय एवं सगंध पौधा संस्थान, लखनऊ) ने मेंथाल मिंट (पुदीना परिवार का पौधा) की 12 किस्मों का विकास किया है। जिससे देश के खासकर उत्तर प्रदेश के किसान नई तकनीक से खेती कर मालामाल होंगे। साथ ही अब मेंथाल मिंट को विदेशों में निर्यात किया जा सकेगा। कभी देश मेंथाल मिंट का आयात विदेशों से करता था लेकिन अब इसकी खेती और निर्यात में न केवल आत्मनिर्भर हो चुका है बल्कि विश्व पहले नंबर का उत्पादक और निर्यातक बन गया है। कुल वैश्विक उत्पादन का 80-85 प्रतिशत हिस्सा अकेले भारत में उत्पादन होने लगा है। करीब 40,000 टन मिंट ऑयल और इससे जुड़े उत्पादों का सालाना निर्यात होने लगा है। इस मेंथाल मिंट की क्रांति के पीछे सीएसआईआर-सीमैप की तीन दशक से चली आ रही वैज्ञानिक शोध और तकनीकी सहयोग की अहम भूमिका रही है। आधुनिक और उन्नत किस्मों की मदद से किसान अब मेंथा की खेती को जायद (रबी और खरीफ सीजन के बीच) के मौसम में बोनस फसल के रूप में उगाने लगे हैं। इससे उन्हें अपनी मुख्य अनाज फसलों से अधिक आमदनी हो रही है। संस्थान के वैज्ञानिक डॉ. मनोज सेमवाल के अनुसार मेंटहॉल मिंट और उससे जुड़े उत्पाद भारतीय अर्थव्यवस्था में 5,000 करोड़ रुपये से अधिक का योगदान दे रहे हैं।

मेंथाल मिंट की 12 किस्मों के नाम

Exotic Eustoma Blooms For The First Time In Odisha's Sambalpur, To Sell For Rs 1500 A Bunch

CSIR-NBRI

5th September, 2025

Flowers in shades of pink, purple and white speak of the floral history that Sanatanpali village in Sambalpur district scripted as rays of the sun kissed the first blooms of exotic North American flower Eustoma. Making this possible is a 25-year-old farmer, Itish Pradhan, who with the support of scientific institutions and local administration has experimented with a new flower crop that has not only motivated him to scale it up but also given new hope to other farmers.

The idea was seeded by CSIR–National Botanical Research Institute (NBRI), Lucknow, which provided 2,000 seedlings of Eustoma to the Green Sanatanpali Farmer Producer Organisation (FPO), of which Itish was a member. A poly house, made available to him in collaboration with the district administration, was handed over to Itish. It was a time when he had left his job at a steel plant to pursue floriculture. Marking the beginning of a new revolution, on April 14, Union Minister and Sambalpur MP Dharmendra Pradhan inaugurated the plantation of the seeds. In four months, the experiment has yielded results and Itish proudly ...

Lavender lattes, mocktails, soaps... the flower is perfuming Jammu's Baderwah town in multiple ways

CSIR-IIIM

7th September, 2025

The shift began in 2016, when the Council of Scientific and Industrial Research–Indian Institute of Integrative Medicine (CSIR-IIIM), Jammu, introduced lavender cultivation in Baderwah, nestled in the Chenab valley, under the Centre's Aroma Mission. The results were dramatic: farmers began earning three to four times more than they did from traditional crops like maize. But the transformation did not stop there. Baderwah is now buzzing with entrepreneurial energy, with cultivators launching startups built on lavender's growing popularity.

“My company was made out of lavender,” says Touqeer Ahmed, managing director of JK Aroma. What began as a small lavender patch eventually grew into a business empire. Founded in 2017, JK Aroma today sells over 25 value-added products—soaps, oils, perfumes, tea, incense sticks and more—through outlets in Jammu and Kashmir, Goa, ...

Hyderabad and Kolkata scientists develop smart metal agents to combat aggressive breast cancer

CSIR-CCMB

7th September, 2025

In a groundbreaking collaborative research effort, scientists from Hyderabad and Kolkata have discovered new, powerful agents that can fight aggressive forms of breast cancer. These therapeutic agents, which are tiny metal compounds, can act like ‘super-soldiers’ with a special ability to fight the tricky triple-negative breast cancer cells, unlike chemotherapy, radiation and surgery, which act on even healthy cells and not just cancer cells.

Developed by scientists from Hyderabad-based Centre for Cellular and Molecular Biology ([CCMB](#)) and IISER Kolkata, the powerful agents effectively target and kill the cancer-causing cells in two distinct ways.

The study, published in *Journal of Medicinal Chemistry* (July, 2025), indicates that the anti-cancer agents, which are metal-based compounds, enter the cancer cells and begin damaging them through a process called reactive oxygen species (ROS). These agents can destroy the defences of cancer cells, which are proteins known as peroxiredoxins and superoxide dismutase.

Without their defences, the cancer cells are destroyed in two different ways. One way is a process known as ferroptosis, where cancer cells basically rust from inside and fall apart. In the other way, which is known as autophagic cell death, where the anti-cancer agents ...

TB patients to benefit from millet-rich nutrition kits

CSIR-IHBT

7th September, 2025

In a significant push towards TB elimination, ACME Welfare Foundation, New Delhi, in collaboration with Tashvika India Food, has joined as a Nikshay Mitra in Himachal. This initiative stands out by offering millet-based nutrition kits instead of traditional grain donations, tailored to aid faster recovery in TB patients.

Designed using research from CSIR-IHBT, Palampur, and ICAR-IIMR, Hyderabad, the kits include highly nutritious items under the “Amrit Bhojanam” brand — such as multi-millet high-protein panjeeri mix, ragi cookies and millet nutribar. Rich in vitamins, iron and dietary fibre, millets have a low glycemic index, making them ideal for TB patients and the general population alike.

A millet awareness workshop was also held at Zonal Hospital, Dharamsala, supported by local Rotary and Inner Wheel Clubs. Sadhvi Pandey, MD of Tashvika India, educated attendees on millet’s health benefits and proper cooking ...

CSIR DG commends NITI Aayog for meeting on Ease of Doing R&D

CSIR

10th September, 2025

Director General of CSIR N. Kalaiselvi commended the timely consultation process initiated by NITI Aayog for revamping scientific research in the country, stressing the need for the coexistence of various funding agencies along with newly created networks, and the enhancement of the number of fellowships in all categories as mandatory measures for furthering indigenous science and technology development.

The two-day sixth regional consultative meeting on 'Ease of Doing R&D,' hosted by CSIR-IICT, Hyderabad, commenced on Wednesday. Delivering the keynote address, N. Kalaiselvi said that trust-based funding, performance-based evaluation, and accountability with transparency were urgent necessities. "It is also essential to take into account a variety of scientific disciplines with their differing environments of functioning, and problems of statements have to be accommodated into the reformed systems for advancing national scientific goals," she said.

Welcoming the gathering of the eminent scientific community, host institute ...

'Samudra Pradakshina': In a first, tri-service women begin 21,600-nautical mile global sail

CSIR-NIO

11th September, 2025

Defence minister Rajnath Singh on Thursday flagged off a historic tri-service all-women circumnavigation sailing expedition, named 'Samudra Pradakshina'. The expedition, the first ever of its kind in the world, commenced from the Gateway of India in Mumbai, according to a press release by the ministry of defence. Rajnath Singh, in his address from South Block during the flagging off, said the voyage was a symbol of 'Nari Shakti', 'Aatmanirbhar Bharat', and military diplomacy, while also showcasing the collective unity of the three services.

Singh said that 'Samudra Pradakshina' was not just an expedition, but a spiritual sadhana, adding that the officers may face numerous challenges, but their "flame of determination" would help them navigate these.

"We believe that when there is a feeling of jointness among the armed forces..."

UP CM Adityanath, Union Minister Jitendra Singh to visit Lucknow CSIR Start Up Conclave on September 15

CSIR

12th September, 2025

Uttar Pradesh Chief Minister Yogi Adityanath and Union Minister of State (Independent Charge) for Science and Technology Jitendra Singh are set to visit the CSIR Start-up Conclave 2025 in Lucknow on September 15. The two-day conclave will be held from Sunday to Monday to promote indigenous technologies, start-ups. Scientists, innovators, industry leaders, entrepreneurs, investors, and policymakers will also attend the event,

centred on the theme 'Translating R&D into Start-ups: Innovation for Agriculture, Environment & Health for industries and society'. The event is organised by four Lucknow-based laboratories of the Council of Scientific and Industrial Research (CSIR): CSIR-National Botanical Research Institute, CSIR-Central Drug Research Institute, CSIR-Indian Institute of Toxicological Research, and CSIR-Central Institute of Medicinal & Aromatic Plants...

Engineering duo turns crop waste into eco-friendly leather

CSIR-CLRI, CSIR-NCL

13th September, 2025

Two tech-savvy graduates are shaking up the leather industry with their vegan startup, 'Avinya', using agricultural waste to create durable, biodegradable leather and attracting major interest before hitting the market. Two young boys, one studying to be a Civil engineer and the other a Computer engineer, are allocated a room in the dorm at Ahmedabad University. As luck would have it, both students were deeply concerned about the stubble burning and the pollution it causes in Punjab, Haryana, and UP. Their daily conversations became increasingly focused on stubble burning and the dangers of leather industry pollution. It got to a point that the two of them, Jenil Gandhi (22) and Manan Vyas (23), decided that they should start a business that would be able to tackle these two problems at least.

The duo began working on their idea right after graduating in 2023, setting aside their engineering degrees to pursue a greater purpose. "Since we knew nothing about leather, we had to start from scratch," says Jenil. "We got in touch with some leather experts in Germany, and it was their encouragement and our persistence that helped us get the initial knowledge."

They soon connected with the Central Leather Research Institute (CLRI...

Agri-innovation workshop held in Wokha

CSIR-NEIST

13th September, 2025

A consultative meeting and capacity-building workshop on “Advanced Agriculture and Allied Sector Development through Science, Technology and Innovation” was held at the Deputy Commissioner’s office, Wokha, on Friday. The programme was jointly organised by the District Administration, Wokha, and CSIR-Northeast Institute of Science and Technology (NEIST), Jorhat.

Addressing the gathering, Director of CSIR-NEIST, Dr. Virendra M. Tiwari, underscored the potential of Wokha’s agro-climatic conditions for floriculture, apiculture and aromatic crop cultivation. He highlighted chamomile as a promising crop for the region, noting that it can be cultivated thrice annually in Nagaland and supports monofloral honey production due to its nectar-yielding properties.

Technical sessions during the workshop covered high-value flowers such as peony, ranunculus, gladiolus and marigold under floriculture; chamomile, lemongrass, citronella and essential oils under aromatic crops; and integrated beekeeping with honey production and by-products. Dr. Tiwari assured continued support from NEIST to farmers ...

CSIR-IMMT Bhubaneswar and University of Saskatchewan Canada sign Joint Declaration of Intent to advance critical minerals research

CSIR-IMMT

13th September, 2025

The Council of Scientific & Industrial Research – Institute of Minerals and Materials Technology (CSIR-IMMT), Bhubaneswar, India, and the University of Saskatchewan (USask), Saskatoon, Canada, have taken a significant step in critical minerals research collaboration through a Joint Declaration of Intent.

At a ceremony hosted at the High Commission of Canada in New Delhi, Dr.Ramanuj Narayan, Director of CSIR-IMMT, formalized the Joint Declaration of Intent (JDI). Dr.Baljit Singh, Vice-President Research, USask, participated virtually and reaffirmed the University's commitment to the collaboration.

The event was presided over by Scott Matthies, Managing Director, and Harish Vaidyanathan, Senior Trade and Investment Officer from the Saskatchewan Trade Office in India, with faculty and scientists from both countries also joining online. This understanding follows a high-level delegation from the University of Saskatchewan ...

Exotic Eustoma blooms in Odisha with NBRI efforts

CSIR-NBRI

14th September, 2025

Eustoma, a flower until now available in Odisha only through imports, has bloomed locally for the first time — opening up opportunities for farmers to cultivate the exotic plant and reap profits. After successfully growing Eustoma on its campus in Lucknow, the National Botanical Research Institute (NBRI), a research arm of the Council of Scientific and Industrial Research

(CSIR), has achieved a breakthrough by cultivating the flower - native to Mexico and America - in Odisha. The flower bloomed in a polyhouse developed by NBRI at Sanatanpali in Sambalpur district. “For months our scientists were relentlessly devoted to testing whether the plant could survive in hot conditions. If Eustoma can thrive in Sambalpur, farmers will be able to cultivate it in their fields,” said NBRI Director Ajit Kumar Shasany. Calling the development a major boost to hi-tech floriculture in Odisha, Dr. Shasany added, “This initiative opens new avenues for farmers, creates livelihood opportunities, and introduces exotic flowers ...
